BUFFALO:

ITS

MANUFACTURING, COMMERCIAL AND BUSINESS POSITION

IN 1865.

BY GUY H. SALISBURY.

IN glancing at the progress of our city since the spring of 1862, we may well call attention to the fact, that the permanent elements of its prosperity have been more largely developed than at any former period. Its facilities for transacting the rapidly augmenting produce business of the West, have been rendered so ample, that it securely holds the position of one of the greatest Grain Marts of the World. In fact, the business of the largest grain markets of the Continent of Europe, is unimportant, compared with that which now pours into Buffalo from the exhaustless granaries of the wide prairies, and fertile valleys of the immense regions westward of this point. Its capabilities, too, for all branches of manufactures, from the production of the great staple of Iron, and the working of it up into the multifarious forms which the Protean hand of Art furnishes for the wants of consumers, to the innumerable minor articles requiring practical ingenuity, and diversified labor, have been established beyond question. The Titan Steam, with more than Briarean arms, is ever busy in its workshops, with tireless toil, accomplishing useful results, of which the aggregate is hardly guessed by even our own citizens.

When a full supply of cheap and good coal shall be assured to us—and steps are being taken to secure it—meeting here the iron, copper and lead, of the vast mineral regions of the Northwest—here, where a numerous working population are busily employed, with strong or skilful hands, to transform, those valuable ores into every imaginable shape, we can scarcely set limits to the extent and importance of the Manufactures of Buffalo. That this is beginning to be appreciated abroad, we have evidence in the fact that capital is

flowing hither from other quarters, and being invested in various branches of mechanical production.

Thus building up, with a sure and healthy growth, it is not surprising that notwithstanding thousands have been sent forth from this locality, in the several military organizations, to aid in suppressing the Southern Rebellion, there has been a steady and considerable increase of our permanent population. Yet, from the somewhat exaggerated estimates which were made, in advance, as to the number the State census of 1865 would give us, and the imperfect manner in which that enumeration was made, we do not show the large positive increase that was anticipated. But we have the best reason for believing that our population, at this time, is over 100,000. That there has been an actual and substantial addition to the resident families among us, is satisfactorily shown by the increased demands for dwellings, at much higher rents than heretofore, and the gratifying fact that real estate has met with readier sales, although not at unreasonable or speculative prices.

The population of Buffalo, each semi-decade, for the past forty years, has been as follows:

| | | | |
|----------------|---------|------------|--------|
| 1825,..... | 2,412 | 1830,..... | 8,668 |
| 1835,..... | 15,661 | 1840,..... | 18,213 |
| 1845,..... | 29,773 | 1850,..... | 42,216 |
| 1855,..... | 74,214 | 1860,..... | 81,121 |
| 1865, say..... | 100,000 | | |

In contemplating the future of our city, we should take in the fact, that it is to be one of the points of the Great Pacific Railroad—which, spanning a Continent, is to connect the Eastern and Western Oceans, and be the International Highway for the commerce of empires. Our position with reference to either of the two Northern routes, clearly indicates the share we may claim in the benefits of this immense National enterprise.

As an element of present growth, it may be mentioned, that the constant increase of manufacturing establishments, furnishing employment to many operatives, who so greatly aid in strengthening the foundations and advancing the fortunes of a city, has stimulated, in an unprecedented degree, the building of comfortable homes for the working classes. The "Union Iron Works"—comprising the large establishments originally started by Palmer & Wadsworth, and Warren, Thompson and others—have built up quite a village around their works, occupied solely by their workmen and families, and contemplate erecting more. Pratt & Co. have also put up neat cottages, in the neighborhood of their extensive Iron Works, and made that portion of the hitherto quiet locality of Black Rock, a busy hive of industry.

The wonderful development of Petroleum, from the innumerable wells which have been sunk in different parts of the country during the past five years, has given birth to an astonishing activity in all branches connected with the Oil interest. Ten Refineries have been established here, whose supplies of crude oil come mostly from Pennsylvania. Buffalo, in fact, may claim

a prominent position in the Oil trade. The well known house of F. S. Pease, has long been noted for its superior Oils, which it is constantly shipping to foreign markets where they are in demand. His elaborate and interesting Oil Circulars, published yearly, have given him a wide-spread reputation, both in this country and in Europe.

The growing importance of our manufacturing interests, induces us to gaze with commendable pride upon the busy, glowing picture of those industrial activities; but we must not overlook the vast commercial transactions which are daily taking place in our harbor and along its wharves. The demands of trade have brought into requisition a large number of Propellers, in addition to the many sail vessels whose white wings used to sweep the Lakes alone, and they perform their trips with increased speed, safety and certainty. The vessels remaining in commission are some of them of large capacity, carrying 18,000 to 36,000 bushels of grain, and the smaller craft find mostly freight of coal, staves, lumber, salt, &c. A very large part of the Lake business is now transacted by a few mammoth steam lines, having facilities for daily trips, and running in connection with the leading railroads. The propellers of the New York Central Railroad, the Erie Railway, the People's Line, and the Western Transportation Company, are most of them models of their class of boats, combining strength, speed and beauty.

Much of the extraordinary commercial prosperity with which Buffalo has been favored during the past four years, has undoubtedly been due to the fact that the stoppage of communication between the North and South, on the great channel of the Mississippi and the derangement of railway lines in the middle States—particularly the Baltimore & Ohio—had the effect to throw a vast amount of the internal commerce of the country through Northern routes. It was quite common to see those staples of Southern production, Cotton, Sugar, Molasses, Tobacco, &c., unloading at our wharves, awaiting further transportation Eastward.

Although thus impelled to seek a Northern route, by the force of unwonted circumstances, it may not be unreasonable to suppose that the favorable relations established between the producers and dealers in the Southern staples, and their agents and factors at the North during the four years of interruption to their former routes, will induce them to continue their business here, to some extent, now that the obstacles are removed. Yet should such extraneous shipments be wholly withheld, there will still be abundant sources from whence the future commerce of Buffalo and the Lakes will find full and profitable employment. When we take into consideration the rapidly augmenting crops of cereals in the West, and the mineral productions of the Northwest, comparatively undeveloped, the lumber, salt, furs, cattle, sheep, swine, wool, hides, products of the dairy, &c., &c., that are destined by the laws of trade to seek the seaboard, we can well believe, that every existing channel, whether by Lake, Canal, or Railway, will be required for the trans-

actions of that vast internal trade, which exceeds in amount the aggregate of the foreign commerce of the Union.

The number of arrivals and departures from the Port of Buffalo, for each year since 1861, and the movements of flour and grain, is shown below:

ARRIVALS AND DEPARTURES BY LAKE.

The aggregate of the arrivals and departures from the Port of Buffalo, the total tonnage, and the number of seamen employed, for the past five years, were as follows:

| | Arrived and Cleared. | Tonnage. | Seamen. |
|-----------|----------------------|-----------|---------|
| 1861..... | 13,886 | 5,963,896 | 144,173 |
| 1862..... | 16,390 | 6,689,191 | 166,133 |
| 1863..... | 15,376 | 6,757,803 | 157,415 |
| 1864..... | 14,105 | 6,891,348 | 148,161 |
| 1865..... | 13,444 | 7,032,593 | 145,864 |

THE GRAIN TRADE.

The statistics of the Grain Trade of Buffalo, present us with some striking contrasts, and illustrate, at a glance, its progress. In 1837, the receipts of Flour were 125,805 bbls.—in 1862, 3,506,022 bbls. In 1846, we sent Eastward, by canal, 1,437,994 bbls.—in 1864, but 126,820 bbls.—that article being almost wholly taken by the railroads. In 1836, the receipts of Wheat were 304,090 bushels—in 1864, 17,677,549 bushels, (not including flour reduced to wheat.) Of Corn, there were received here, in 1845, but 54,200 bushels—in 1862, 24,288,627 bushels. The receipts of 1864 were lessened full fifty per cent. by the deficient crop. Of Oats, there were received, in 1843, but 2,489 bushels—in 1864, no less than 11,682,637 bushels!

The following table will show the comparative receipts of Grain, at this Port, for the past five years:

| | Bushels. |
|-----------|------------|
| 1861..... | 61,460,601 |
| 1862..... | 72,872,454 |
| 1863..... | 64,735,510 |
| 1864..... | 51,177,146 |
| 1865..... | 41,327,300 |

The great increase in the commerce of 1862, over that of 1861, was due to the large crop and active foreign demand, which brought out every craft that could float. Although the small crop of 1864, and the absence of foreign demand, owing to the high prices ruling here, in depreciated currency, gave us a much smaller amount of receipts than we expected, yet, comparing our trade with that of Odessa, the greatest grain market on the Continent of Europe, we find that even in 1864, our grain business was two and a half times larger! And the published statistics of our Board of Trade show that more grain is handled here than at Chicago, the granary of the Northwest, or at New York City, the great outlet to all the markets of the World!

In addition to the large business transacted by Lake and Canal, the lines of railway converging to this point, add much to the activity of our streets

and wharves, during the business season. The New York Central, the Erie, with its branches, and important connection with the Atlantic and Great Western, the Lake Shore, the Buffalo and Lake Huron, connecting with the Great Western and Grand Trunk of Canada, give us thousands of miles of business communication, in all directions.

Besides these, we are soon to have a branch of the Atlantic and Great Western, to communicate with the great Canada lines by the proposed magnificent International Bridge, across the Niagara River, now certainly to be built forthwith, in connection with the Erie and Ontario Railway, between Lakes Erie and Ontario; and the projected railway from this city to connect with the Philadelphia and Erie road at Emporium, (formerly Shippen,) by which we are to have not only a new and advantageous route to New York, Philadelphia, Baltimore and Washington, but are thus at last to reach the invaluable coal fields of Northern Pennsylvania, and to soon furnish our citizens and manufacturers with an abundant supply of cheap fuel. This road is called the Buffalo and Washington Railway. And the Oil Regions, too, are to be practically brought nearer to us by the Buffalo and Oil Creek Railway, which has recently been taken in hand by citizens of wealth and influence among us.

A most noticeable and important feature in the improvements which have characterized and marked the growth of Buffalo for the past five years, is the enormous increase in our facilities for receiving, storing and shipping grain, created by the erection of the numerous and extensive Elevators which line our harbor. The following list gives the names of these structures, with their storage and transfer capacity:

| Elevating Warehouses. | Capacity for Storage, Bushels. | Transfer Capacity per day, bushels. |

Two other Elevators—the Main Street and Corn Dock—were destroyed by fire, the present season. Their storage capacity was about 400,000 bushels, and could elevate per day, nearly 200,000.

It is not generally known, that to Buffalo belongs the honor of having introduced the system of elevating and storing grain, by steam, for commercial purposes. Elevators have been in use, to a limited extent, for transferring grain from vessels to flouring mills, but not as an auxiliary to commerce. In 1843, our fellow citizen, Joseph Dart, built, on our harbor, the first Elevator, of that kind, in the world. It was looked upon by practical men, as a doubtful experiment.

It had only a storage capacity of 55,000 bushels, and could transfer but 1,000 bushels per hour. But the success of the enterprise was at once demonstrated, in spite of all obstacles, and Mr. Dart has lived to see twenty-seven lofty and capacious Elevators lift their imposing towers along the borders of our harbor. The large and costly one built by D. S. Bennett, now occupies the site where that of Mr. Dart's stood. William Wells, now of the firm of Seymour & Wells, Wadsworth Elevator, was foreman for Mr. Dart, when his Elevator was put in operation, and is therefore the oldest Elevator man, now in the business, in the world.

The original narrow limits of our harbor—which was merely the channel of the Creek, from the pier to the toll bridge—were so much extended when the Ohio and Erie Basins, the Blackwell Ship Canal, and connecting slips were excavated, and the Breakwater constructed, that it seemed as if enough harborroom and wharfage were secured for half a century to come. But the wants of commerce and manufactures have already occupied most of the ample space then provided, and the large establishment of the Union Iron Works, located above the toll-bridge, requiring daily vessel loads of ore and coal, induced an effort to still farther extend the harbor up the Creek. To accomplish this, a channel has been cut around the northerly end of the bridge, and the Creek deepened above that point, by the removal of its rocky bottom so as to allow vessels drawing twelve feet to pass up to the wharves of the Iron Works, and above. This expensive enterprise opens an additional Creek front of many thousand feet; and the territory thus made available will furnish suitable locations for coal and lumber yards, ship and canal boat building, &c., and thus relieve the more densely occupied portions of our harbor from some of the obstructions that have often caused vexatious delays in the discharge of cargoes, and movement of lake and canal craft.

The Sea Wall which was constructed by the General Government, some twenty years ago, for the protection of the low lands adjoining the Creek against the waters of the Lake in heavy gales, has lately been considerably extended and repaired by the Government, the better to accomplish the object.

In connection with the subject of our harbor and its commerce, may be

mentioned the superior ship building done at this Port. Some of the finest vessels of their class—both sail and steam—that are to be found anywhere, are built at our yards. The beautiful and staunch propellers which have been there launched, are unrivalled by any on the Lakes. Repairs of boats and vessels are likewise readily accomplished by means of seven dry-docks of ample dimensions. At no point on the Lakes can ship building and repairing, in all their details, be done to better advantage. Engines, boilers, and machinery of the best construction, can be furnished by several establishments within a short distance from the ship yards, and the fitting up of boats and vessels in every department of use or luxury, is likewise to be had in a style unsurpassed in the country. The mammoth palace steamers which were here put afloat, a few years since, for the passenger travel that thronged the Lakes, before the competing railroads had taken it away, were then without superiors on any waters, in model, speed, cost and magnificence of appointments.

Turning from the gratifying picture of our commercial and industrial prosperity, we are proud to contemplate the educational, religious, and social aspect of our favored city. With a system of Public Schools, affording the benefits of free instruction to thousands of youth who are growing up to take their places in the respective positions of society, a Female Seminary of the highest character, excellent private schools, a Medical College of deserved repute, with humane and charitable institutions of enlarged beneficence, we need not fear comparison with any of the cities of the Union. The moral and religious culture of this community, is well evidenced by the numerous and beautiful churches that rear their sacred spires high above our thronged business marts, and the thousands of clustering homes around them; while our municipal regulations for preservation of good order, safety of persons and property, and prevention and punishment of crime, are as wisely and vigorously administered as in any part of this broad land. An unlimited supply of water from the blue current of Niagara, contributes to private convenience, and adds greatly to our safety from disastrous conflagrations. One of the best Gas Works in the country, furnishes an abundant quantity of that now indispensable element of light to every part of our wide-spread city. Broad and clean streets, often bordered with grateful and graceful shade trees, and paved in a most superior manner, have long been a feature which has deservedly characterized Buffalo as one of the most beautiful and pleasant cities of the North.

The architecture of the city is improving, year by year, and has given us many elegant monuments of taste and liberality. We have recently witnessed the erection of several fine churches, which are truly public ornaments. Among them may be mentioned the Westminster, Calvary, Church of the Messiah, St. Joseph's and the Jesuit Cathedrals; while those of older date, St. Paul's, St. John's, Central Presbyterian, and North Churches, are credita-

ble structures. Many of our private dwellings are of palatial character. Some on the noble avenues of Main, Delaware, Franklin and Niagara streets, would do no discredit to the famous Fifth Avenue of the Great Commercial Metropolis of America.

While Buffalo has not been destitute of good hotels, it has been a general complaint throughout the country, on the part of the traveling public and business men, whose pursuits led them to make frequent journeys here, that we did not come up to the standard in hotel keeping, that we had attained in many other things which belong to a large city. And since the destruction of the Clarendon and American, and the conversion of the St. James to other purposes, the deficiency of first class hotel accommodations has been so manifestly apparent, that movements were made, last Spring, by a number of public spirited persons, to procure the erection of a suitable building on a large scale. The enterprise has not, as yet, been carried any further than the procurement of plans, estimates, &c.; but our energetic townsman, George W. Tift, has met the public demand, for the present, by putting up the "Tift House," on the site of the "Old Phoenix Hotel." This elegant building is conveniently arranged for a first class hotel, and is well kept by the Messrs. Hodges, who were so long identified with the "American."

A long stride in the way of modern improvement was made when steam fire engines were introduced into our city. Their great capacity for work, with untiring sinews of steel, fit them to cope with the fiercest conflagration, far better than can the best efforts of the noble firemen, who have so bravely "fought fire" for our safety, for more than forty years. Buffalo was proud of those men, with their stalwart forms, their neat uniforms, their finely kept and gaily decked "machines," their engine houses so often tastefully and elegantly fitted up—proud of their heroism, their enthusiasm, their general good conduct. We could not but regret to see company after company fall away, as the new steam engines one by one superseded their services. Yet the change was one of public necessity, and the firemen have yielded gracefully and quietly. But one company of the old organization remains, No. 9, located at the "Hydraulics," and continues to do duty manfully, whenever occasion calls for its services. The city now owns six steam engines, which are attended by five volunteer hose companies.

One of the most creditable and useful institutions of the city, is the "Young Men's Association." For thirty years it has diffused its benefits among all classes of our community. Foremost in its management have ever been the most intelligent, energetic and public spirited of our citizens. Its Presidents and Managers have been, from first to last, our leading business men. The importance of its position, and its capabilities for future usefulness, have been so sensibly felt, that within the last two years, most spirited and successful efforts have been made to establish it upon an assured basis of present and continuous prosperity. For the purpose of providing it with a

suitable and permanent home, a subscription was suggested, which was most nobly and munificently responded to. Sums from \$3,000 downward were freely and promptly subscribed, and the effort resulted in the purchase of the stately pile of buildings known as the "St. James Hotel," and the "St. James Hall." By a judicious and liberal outlay, under the untiring supervision of the late President of the Association, S. V. R. Watson, aided by the Managing Committee, those buildings were speedily transformed to suit the new purposes to which they were to be devoted. Within their ample walls, suitable rooms were found for the library, cabinet and reading rooms of the Association; for the Fine Arts Academy, with its gallery of rich gems in Painting, Sculpture, &c.; for the Society of Natural Sciences, with its choice specimens in various departments of Nature; for the Historical Society, with its invaluable collection of whatever illustrates and perpetuates our Local History; for the Grosvenor Library, a most beneficent provision in aid of the mental improvement of our citizens; for the Law Library, with its treasures of legal knowledge; for the Young Men's Christian Union, of noble aims and disinterested benevolence; for the Young Men's Catholic Association; for the Buffalo Medical Association, and for the Firemen's Benevolent Association. The spacious and elegant corridors of the edifice afford convenient access to all these institutions, of cognate character, under the same roof, and thus the whole building is made a beautiful Home of Art, Science and Literature. The St. James Hall, with which it connects, is used for its courses of lectures, &c.

A very material addition to the comfort and convenience of our citizens has been made by the Street Railroads. They have rendered distant parts of the city readily and cheaply accessible, and have correspondingly enhanced the value of lands outside its more settled limits. Besides four now constructed, two others were projected—on Seneca and Ohio Streets—which the high price of labor, materials, &c., have prevented, as yet, from being built. Bating some well grounded complaints about crowded cars, and occasional irregularities of running, the Street Railroads are decidedly beneficial "institutions," and could not now be dispensed with, without paralyzing the extremities of our wide-spread corporation.

Most creditable to Buffalo as a city, and to many of its patriotic and liberal inhabitants, have been the munificent contributions here made, during the progress of the fearful civil war just closed, in support of the sacred cause in which so many of our friends, and sons, and brothers, have been contending for the existence of their imperilled country. Bounties, to an enormous amount, have been lavishly paid to encourage enlistments of volunteers, or to relieve those who were drafted, but whose family ties often prevented from taking the field in person—provision has been freely made year after year, for the wants of families left behind by those who marched forth to share in the deadly strife—donations have been constantly made in response

to the frequent appeals sent forth for aid to the various organizations which have extended relief and comfort to the sick and wounded soldiers—the United States Sanitary Commission, the Ladies' Aid Society, and the Christian Commission, have vied with each other in their noble work of ministering to the necessities or sufferings of the country's brave defenders—and large amounts have been unhesitatingly invested in the National loans which were required to meet the colossal expenditures of the General Government. The "Soldier's Rest," a most timely and much needed institution, has been built up out of these humane enterprises, and has contributed greatly to the relief of sick, wounded, maimed and hungry soldiers. Surely Heaven's blessing will rest upon those who have been instrumental, either by gifts or personal services, in instituting this "haven of rest." They are truly the "Good Samaritans" of the Age.

With all the natural and artificial advantages possessed by our city, it is idle to suppose that we can attain the high destiny we aspire to, without diligent, energetic, and continuous effort. Buffalo can no longer sit, as in years gone by, upon an undisputed throne, at the foot of the Inland Seas, whose waves wash the shores of so many fertile States, and lave the wide-stretched borders of the British Possessions; with the Grand Erie Canal winding its broad way from the waters of our own harbor to those of the Hudson; while railroads, radiating in every direction, are swiftly bearing their huge burdens Eastward or Westward, in obedience to the behests of Trade. Our position is not as invincible as it seemed to be before the advent of the Locomotive. Twenty-five years ago, we held the key to the exchanges of the East and West. That commerce could find no other channel, save an inconsiderable portion that passed through the Welland Canal. But the great lines of railroad began to be built, ignoring the beaten track of traffic—defying and overcoming natural obstacles. With singular fatuity, our capitalists did not even attempt to become masters of the new situation. The Erie Road planted its Western Terminus at Dunkirk, when it should have been and might have been at Buffalo. The Great Western, with its enormous Canadian connections, sought, at Buffalo, to connect with the American lines, but no International Bridge would Buffalo build, and so they got one at Niagara Falls. Thus were two "shunpikes" put up at once. The struggling manufacturers of Buffalo asked for plenty of cheap coal, from mines within a hundred miles of the city, and from which a paying road could have been easily and cheaply built; but the road was not made, and they have had to get coal the best way they could, and a round-about way it is.

But we believe that the influence of a new spirit is now felt, which will ensure great and substantial results. The Erie Railway now practically terminates here. The International Bridge will soon connect at this point, the Canadian and American roads, with their vast ramifications. The Coal Road is being pushed forward. Wealth has but to co-operate with Enterprise and

Labor, as the capital wielded here is already large and rapidly increasing. Intelligently directed, it can create additional facilities for Commerce and Manufactures, that will largely augment the business of Buffalo, and render its future progress even more rapid than it has been. Possessing the elements of a substantial prosperity, in its advantageous location, its unquestionable supremacy as the Grain Market of the Continent, its far reaching commerce, its extensive systems of railway communication, with its admirable Public Institutions, and the known salubrity of its climate, its growth must be constant, and rapid enough to satisfy the reasonable desires of those most interested in its prosperity.

SKETCH

RELATIVE TO THE EARLY RESIDENTS OF BUFFALO.

IN addition to the foregoing glance at the business position and prospects of our city, it may not be out of place to refer to those earlier residents and descendants, through whose toils and sacrifices the infant village was founded and sustained. Who were they and where are they?

An interesting paper was furnished at the "Old Settlers' Festival," in February of last year, by Colonel BENJAMIN HODGE, embodying his reminiscences of Buffalo, since 1806, in which he thus enumerates the Heads of Families here at the burning of Buffalo, December 30th, 1813, and now living in the city.

* Dan Bristol is now the earliest resident (not born here)—having removed to Buffalo in April, 1811.

† William Wells is now the oldest native inhabitant of the city—born in 1800.

But there is another and sadder record, connected with our city's history. Many of those who have been identified with its progress, from the days of its infancy to its palmy present, have passed away from among us and the places that knew them once, will know them no more forever. Some of them were the Pioneers of Buffalo. Casting their fortunes here in the early and doubtful days, they remained with us to the end of their useful and honored careers, foremost in every good word and work, and contributing all that lay in their power to the social, industrial, moral and religious welfare of the community in which they dwelt. Of those who were the earliest residents, we note the following, whose names occur to us — including also some of their children. This class is intended to embrace, with a few exceptions, those who settled here prior to the completion of the Erie Canal, in 1825, when Buffalo first fairly started in her commercial career :

Being prepared from memory, the foregoing list is necessarily imperfect, and some well-known citizens have doubtless been omitted. It will be seen that few remain who were here prior to the Peace of 1815, when the Village had arisen from its ashes, and was struggling for a name and place among the young settlements of the West. Indeed, the number is inconsiderable of those still living, and who reside here, of the 10,119 inhabitants of Buffalo, when it was incorporated as a city, in April, 1832. The Directory of that year contains 2,119 names, and we can find only 131 of them now known to us as dwelling here.

Such are the mutations of Time and Change in this transitory and fleeting World! We regard them but little as they occur day by day, and year by year, but when are aggregated on one page as it were, the events of over thirty years, they are rendered impressively startling. A generation has passed away, all but a few who linger behind their compeers. The places thus left have been fast filled by the descendants of those who have gone from Earth, or by new comers, whose energy and enterprise are building into greatness the noble city which has grown from the germ planted and nurtured by the Early Residents of Buffalo. We place on record these names from all classes of society, many of them most useful and respected men, worthy to be founders of the "Queen City of the Lakes."

*Below zero.

JANUARY.—Colder by six degrees than the average for seven years. Lake Erie closed by ice on the 1st. Sleighing the entire month.

FEBRUARY.—Temperature four degrees below the average. Sleighing the entire month on snow from four inches to four feet in depth. Slight shock of an earthquake at 2 A. M. the 2d.

MARCH.—Temperature three and a half degrees higher than the mean for seven years. Sleighing the first thirteen days. Buffalo Creek cleared of ice the 16th. Robins came on the 1st and bluebirds on the 9th. Wild geese passing north on the 16th and pigeons flying on the 20th.

APRIL.—Butterflies out on the 2d. Lake navigation resumed on the 25th. Spring ten days earlier than usual.

MAY.—Hard frost on the 12th. Erie Canal open on the 1st. Lilacs and currants in leaf on the 3d. Cherry and peach trees in blossom on the 8th. Plum trees in blossom on the 12th, and strawberries on the 13th. Forest trees in leaf on the 17th. Apple and pear trees in blossom on the 20th.

JUNE.—Warmer than the mean of seven years by five degrees. Strawberries grown in this county in market on the 13th, thirty days from the blossom.

AUGUST.—Less than one inch of rain fell. The third week a drought throughout the county.

SEPTEMBER.—Unusually warm, seven degrees above the average. First frost of autumn on the 19th, leaving 131 days without frost.

OCTOBER.—Ice formed and earth slightly frozen on the 24th and 25th. Slight snow on the 28th. Leaves of forest trees began to fall on the 11th, and were all off by the 31st. The month $2\frac{1}{2}$ degrees colder than the average.

NOVEMBER.—Weather generally fine for outside labor. The light fall of rain remarkable.

DECEMBER.—An even winter month—warmer by one degree than the average for seven years.

DIRECTIONS TO KEY HOLDERS.

Upon positive information of a fire near your signal box, unlock the door and turn the crank slowly and steadily about twenty-five times, then wait a few moments, and if you hear no ticking in the box, or alarm on the bell in the tower or gongs in the Engine and Hose houses, turn again as before; in no case commence to turn while a ticking is heard in the box.

Never open the box or touch the crank except in case of fire.

Never give an alarm except from the box nearest the fire.

Be sure the box is locked before leaving it.

Never let the key go out of your possession unless to some responsible person for the purpose of giving an alarm, or called for by the Superintendent.

The number of the box signaling the fire will be struck upon the Alarm Bell in the tower, near the city building, and on the gongs in all the Engine and Hose houses. For example—To announce an alarm from signal box No. 5 the bell and gongs will be struck 5 blows. If

from No. 15, the bell and gongs will be struck once, and after a pause of 5 seconds will be struck 5 times; thus 1-5=15. The number of the box will be repeated at intervals of from 10 to 30 seconds, until a sufficient alarm has been sounded.

BUFFALO FEMALE ACADEMY.

This institution is situated in the most eligible and delightful part of the city, and commands a beautiful view of the city, the river, and the lake. The grounds, consisting of a whole block, fronting on Delaware avenue and extending to a charming private park in the rear, are tastefully laid out and ornamented with trees and shrubbery.

The buildings, "The Cottage" and "Goodell Hall," combine all that is desirable in arrangement and convenience. The former is built of stone, and is exclusively occupied by the family of the Principal, the young ladies entrusted to his care as boarders, and the teachers of the institution boarding with the Principal. The latter, "Goodell Hall," has been expressly erected for academic instruction, and for spaciousness and convenience, may well challenge comparison with any similar establishment in the country. It has abundant accommodations for four hundred pupils. Rev. A. T. Chester, Principal.

Board of Trustees.—Hon. N. K. Hall, President; Rev. A. T. Chester, D. D., Secretary and Treasurer. Samuel F. Pratt, Dennis Bowen, Noah H. Gardner, Henry W. Rogers, Bronson C. Buffalo Society of Natural Sciences.—Organized December 5th, 1861; incorporated January 28th, 1863. The object of this Society is the promotion and study of the Natural Sciences, through the formation of a Museum and Library, the procurement of Lectures, and the use of such other means as shall be found effective. Its primary duties and objects are the collection and preservation of specimens of every vegetable and of every animated being, other than man and the domestic animals, (indigenous to Buffalo and its vicinity,) and of every rock, fossil, and mineral of the surrounding country; to classify, arrange, and make catalogues of them; to send catalogues of them to its correspondents and to all lovers of natural science, who may desire them; to observe, record and diffuse a knowledge of all facts illustrative of the nature and habits of such animals and plants; and, so far as it can, to supply the desiderata of its friends and correspondents. By a reciprocation of the services it desires to render others, as well as by such purchases as it may be able to make, and the gifts of our liberal citizens, its collection will soon represent far more than the local natural history; and it hopes and expects that its rooms will be attractive and useful to naturalists, as well as gratifying to the instructed admirers of God's wonderful works. Its rooms are located in the Young Men's Association Buildings.

The Buffalo Historical Society.—The above Society was organized on the 15th day of April, 1862, and its first election of officers was held on the 20th day of May, 1862. Its general design is to discover, procure and preserve whatever may relate to the history of Western New York, and the City of Buffalo in particular. It will likewise aim to gather statistics of the commerce, manufactures and business of the Lake Region, and those portions of the West that are indimately connected with the interests of Buffalo. For that purpose, it solicits from all persons willing to contribute to the object, donations of books, pamphlets, maps, charts, manuscripts, correspondence, paintings, statuary, files of newspapers, &c., &c., which may have historic importance, or illustrate, in any way, the facts and incidents attendant upon the early settlement and subsequent progress of Western New York and the adjacent regions. Those who are in possession of any of the above described objects of Collection desired by the Society, and may not feel willing to donate or permanently part with them, are respectfully invited to deposit the same among the archives of this Society, to be reclaimed at their pleasure. No property thus deposited will be permitted to be taken from the rooms of the Society, unless with the written consent of the owner or depositor. A fire-proof depository has been secured for the use of the Society. An Annual Oration will be delivered before the Society, on the second Tuesday of January in each year; and Addresses from time to time during the year, of which public notice

will be given. The monthly meetings of the Society will be held on the first Tuesday of every month.

LEGAL HOLIDAYS.

We publish by request the entire act establishing Legal Holidays. It will be seen from this that when either of the holidays named occurs on a week day, the law treats them as Sundays for all purposes connected with the payment, acceptance, or protest of bills of exchange and promissory notes. All notes maturing on such days therefore, must be paid the day before, or, if that is Sunday, the Saturday previous. But when these holidays fall on Sunday, then the next day is also a legal holiday; but the law interposes in favor of the debtors, and allows payment of notes, &c., made after the 16th of March, 1865, to be deferred to the Tuesday succeeding. The following is the bill passed March 18, 1865, chap. 146.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The act entitled "An act to designate the holidays to be observed in the acceptance and payment of bills of exchange and promissory notes," passed April fourth, eighteen hundred and forty-nine, is hereby amended so as to read as follows:

§ 1. The following days, viz: Any day appointed or recommended by the Governor of this State or the President of the United States, as a day of fast or thanksgiving, the fourth day of July, twenty-fifth day of December, commonly called Christmas day, the first day of January, commonly called New Year's day, and the twenty-second day of February, and when the said fourth day of July, twenty-fifth day of December, first day of January, or twenty-second day of February shall occur on Sunday, then the ensuing day thereto, shall, for all purposes whatsoever, as regards the presenting for payment or acceptance, and of the protesting and giving notice of the dishonor of bills of exchange, bank checks and promissory notes, made after the passage of this act, be treated and considered as the first day of the week, commonly called Sunday. And any bill of exchange, bank check or promissory note, made after the passage of this act, which but for this act would fall due and payable on any of the days herein mentioned, shall, when said day falls on Sunday, become payable on the Tuesday next succeeding such days.

§ 2. This act shall take effect on the first day of August next.

THOMAS'

STREET AND AVENUE DIRECTORY

OF THE

CITY OF BUFFALO.

Entered according to act of Congress, in the year 1866, by C. F. S. THOMAS, in the Clerk's Office of the District Court of the United States, for the Northern District of New York.

EXPLANATION.

It will be noticed that in this Street Directory the names of the streets are set down in alphabetical order, giving the course which they run, according, as nearly as possible, to the points of the compass, and enumerating all streets which cross the same in the order in which they occur. In all cases where the numbering of our streets has been perfected, the numbers on the right and left hand corners have been given, so that a person wishing to find, say No. 387 MAIN STREET, on consulting the Street Directory, finds that the right hand corner of Main and Mohawk is No. 379, consequently the place he seeks is only a few doors above. The imperfect numbering of our streets prevents our Directory from being as comprehensive as it might be; still, to the resident or the stranger it will be found to be useful.

ABBREVIATIONS.—N. for North; N. E. for North East; N. W. for North West; S. for South; S. E. for South East; S. W. for South West; E. for East; W. for West; Niag. R. for Niagara River; Sq. for Square; Ave. for Avenue; Al. for Alley.

C. KURTZMAN,

MODERN IMPROVED OVERSTRUNG

Piano Forte Manufacturer

Corner of Niagara and Staats Streets.

All our instruments are built of the best and most thoroughly seasoned materials. Their tone is deep, round, full and mellow, the touch elastic. We were

AWARDED THE FIRST PREMIUM

at the New York State Fair, in 1862, and we claim the right of saying, that our make of Pianos is superior to any manufactured in this country.

EXTRACT FROM THE "ROCHESTER UNION."

MR. G. W. ELLIS, Dear Sir:—I take much pleasure in saying that the Piano you furnished for Grau's Opera Troupe in this city, manufactured by Messrs. Kurtzman & Hinze, is a very fine instrument—indeed as good as I have ever used.

Yours truly,

E. MUSIO,

Musical Director of the Italian Opera.

Every kind of work in our line, as Repairing, Tuning, &c., of Piano Fortes, is done cheap and in the best and most durable manner.

DE VINE BROTHERS,
 MANUFACTURERS OF
 IMPROVED OVERSTRUNG
GRAND SQUARE PIANOS

Factory and Sales Rooms, corner of Niagara and Maryland Sts.

We have now on hand, and for sale cheap, an assortment of our Patent Overstrung Pianos, with all the latest improvements, in plain and richly moulded rosewood cases of elegant design and superior finish, with plain or carved legs of various patterns, which we warrant to be equal to the very best European or American manufacture. We return thanks to our numerous friends who have so generously supported us in our endeavors to establish in Buffalo a factory worthy of the name, where instruments of superior merit are to be had, obviating the necessity of obtaining those made in distant cities, which cost from 15 to 25 per cent. more, without any advantage to the purchaser. The most competent musical judges, both professional and amateur, pronounce our Pianos to have no superior in the country, and we are confident that for quality and volume of tone, they stand unrivalled. We are determined that their present high reputation shall always be maintained, and invite those interested to call and judge for themselves, whether wishing to purchase or not.

EVERY INSTRUMENT WARRANTED FOR FIVE YEARS.

OLD PIANOS TAKEN IN EXCHANGE.

New and second hand Pianos rented, with privilege of purchase, and rent allowed if purchased within a stipulated time.

PROCLAMATION!

I, E. DEXTER LOVERIDGE, of the United States of America, State of New York, and City of Buffalo, do hereby declare to all People, of whatever Kingdom, Land, Name, Nation or Color, Bond or Free, that I will furnish my celebrated

WAHOO BITTERS

For VALUE RECEIVED. All that HAVE must PAY, and to those that have NOT my Charity will extend; for have it you must, in order to enjoy life, to live to the age when the eye of hope looks from time to eternity, contemplating the glory yet to be revealed.

THE WAHOO BITTERS

Are entirely vegetable, being composed of some twenty different roots or barks. This compound was procured in part, from the most eminent Indian Physicians known among our North Western Tribes; the balance from my own Botanical researches, and is a profound secret, making the best compound ever invented for the

PRESERVATION OF HEALTH.

The Spirits used to preserve these Bitters, so that they will keep in any climate, is not an adulterated Alcohol, flavored with poisonous drugs, and claimed to be of Foreign Importation, but is a

PURE RYE WHISKEY!

Distilled in Copper, from the best of Grain, under my direction and careful inspection.

THESE BITTERS

Remove the unnatural acidity of the Stomach, giving to it a natural and healthy action, and when the Stomach is right the whole Man is Right.

☞ The WAHOO BITTERS are drank by everybody, Male and Female. No Family should be without them.

THE REASONS WHY THESE SCALES MERIT PUBLIC CONFIDENCE.

FIRSTLY.—Because they are manufactured upon scientific, long tested, and most approved principles.

SECONDLY.—Because they are made by the most skillful workmen, from the best materials, and with the latest improved machinery, and are hence necessarily *uniform in construction*, and alike accurate and durable.

THIRDLY.—Because, from the central location and superior facilities of the manufacturers, they are furnished at *lower prices* than any other good reliable Scales.

FOURTHLY.—Because they have been *thoroughly tested*, and are in use by some of the leading Railroads, the largest Grain Houses, and most prominent Merchants in the country, and have been pronounced *accurate, reliable and durable*.

FIFTHLY.—Because every Scale is *warranted* to give entire satisfaction, and the manufacturers, who are amply responsible, will always be ready and prompt to make the warranty good.

FINE BOOK AND JOB PRINTING

The subscriber having been engaged in the trade in this city for nearly thirty years, and having during the past five years, re-organized and perfected one of the most extensive and complete establishments in the State, begs leave to call your attention to its peculiar advantages for the execution of Electrotyping, Stereotyping, Engraving, Printing and Binding in all its various branches.

Occupying the extensive premises on Main Street, No. 157, and running through to Washington Street, embracing the whole of the four story buildings, Nos. 180 and 182 Washington Street, we have the great desideratum, ample room, for all our various departments, which are conducted on probably as extensive a scale as any other in this vicinity.

THE PRINTING DEPARTMENT.

We have now running, eight Steam Presses of the most approved construction. Our fonts of type, and other materials, have been selected with great care, from the best establishments of this country and Europe, and the experience of over thirty years has enabled us to systematize this branch of business, and furnish it with such ample facilities, as to give unusual capacity for the execution of

FINE BOOK AND LAW WORK.

Our fonts of Book type of the various sizes are of the most approved cut, and of sufficient extent for turning out Law papers of any number of pages, at the shortest notice. We refer to the leading members of the bar here in reference to this style of work.

In Book work, as well, we admit no superior—and believe our facilities for Book Manufacturing are superior to any other establishment this side of New York.

We refer to our specimens of Printing for Banks, Insurance Companies, Forwarding and Commission Houses, Express Companies, Manufacturing Establishments, &c., with the consciousness that for neatness of work, superior quality of paper, and excellence of binding, they are not excelled.

ELECTROTYPING AND STEREOTYPING.

In these departments we have a very complete apparatus for the execution of Book Work, Blank Work, Engravings, &c., &c., both in Electrotype and Stereotype. Estimates for Book Work given on application.

In conclusion we invite the attention of our business community to the completeness of the Franklin Steam Printing House, for the neat, speedy, and prompt execution of all orders entrusted to us. The liberal share of business which has fallen to our lot for the past few years, has incited the further effort, to make and continue our establishment the model Printing House of the United States.
